

Trends we love: Gold Dust

1. You're so golden

Adding gold can enlighten and uplift a space making us feel more optimistic. Try sprinkling a little bit of gold across each room to spread the confidence this colour brings throughout the entirety of the home.

2. Off the wall

Your overall scheme will ultimately decide which gold tones you opt for. If you have deep blue or teal walls, a rich gold will effortlessly create a royal statement. If you have a neutral space, choose a softer gold that won't interrupt the colours of your home, but instead complement them.

3. Tantalising textures

If you want more than one gold product in the space, whilst wanting to avoid making it look too busy, mix and match different shades and textures. For example, gold wire side tables would discretely match with a velvet cushion that has gold accents within the design.

Top Left to Right: Gold Wire Side Tables Set of 2 £89.99, Metallic Gold Cushion £39.99, Black & Gold 100% Mandala Printed Round Rug £19.99 **Bottom Left to Right:** New Gold Dragonfly Green Velvet Cushion £19.99, White Orchid 64cm Phalaenopsis in Gold Metal Pot £64.99, Gold Palm Tree Teal Velvet Cushion £34.99, Gold Tree of Life Wall Mounted Coat Hook £9.99
