

## Scandi style inspiration from Naturewall

Left to right: SlatWall Acoustic Natural Oak - £159.99, Peel and Stick Natural Oak Planks - £49.99

Scandi design exudes simplistic beauty and is a timeless interior trend. Embracing natural influences and materials, scandi-inspired rooms strip back the unnecessary, with a focus on clean lines and calming spaces. Naturewall are experts in creating Scandinavian-inspired wall coverings that reflect the Nordic countries' relationship with the natural wonder of wood.

Naturewall's sustainable wall coverings offer the ideal scandi fix for the home.

Crafted here in the UK, using real wood veneers, every covering has its own identity, emphasising the organic characteristics of the wood and awakening an inherent sense of harmony.

The stunning SlatWall panels feature high-quality slats that are bonded onto a sound-absorbing felt backing made from recycled plastic. Incredibly simple to install, the panels can be applied directly to the wall using a grab adhesive or screws.

The Peel and Stick planks are finished with European oils and treated with an innovative brushing process, producing gorgeous designs that are the ultimate easy update. To install, just remove the backing paper, stick it against the wall and apply firm pressure to the boards using a J-Roller to activate the adhesive and create a secure fix.

To complete the scandi look, pair Naturewall panelling with neutral yet cosy furnishings and combine biophilic design with natural materials and house plants.
