Humax AURA UHD Recorder

Humax updates AURA Android TV 4K Freeview Play Recorder and adds extra streaming services

- Firmware update for Humax Ultra High Definition TV Recorder adds multiple video and audio improvements for an enhanced user experience
- Apple TV app available on AURA for even more entertainment options
- NOW can be viewed on AURA through Chromecast

16 July 2021: Humax has announced a significant firmware update (9.21) for its Android TV-based **AURA** 4K Freeview Play Recorder, adding numerous audio and video performance enhancements, and improvements to the overall user experience. The firmware will update automatically when the product is in standby mode, or can be activated manually through the settings menu.

Humax has also confirmed that the Apple TV app is now available on AURA, delivering even more exciting entertainment options, and allowing owners to stream purchased or rented content such as blockbuster movies, box sets and music directly to their TV. In addition, NOW can be viewed on AURA through Chromecast, providing a host of additional sports, movies and shows from Sky.*

Firmware update 9.21 features and enhancements:

Upgraded 'Top Picks' and 'Now & Next' guides

AURA now includes a more dynamic Top Picks recommendations guide and Now & Next section with enhanced menus that are easier to navigate.

Quick access to recent apps

Recently-opened apps are displayed by holding down the Apps key, providing fast access to frequently-watched content.

Audio options in setup wizard

The initial setup wizard guides users through the audio options available and selects optimal surround sound settings.

Lip sync outside of live TV

Users can adjust lip sync settings in their favourite apps such as YouTube or Amazon Prime Video.

Audio delay improvements

There is now an option to delay audio by negative milliseconds, enabling improved video synchronisation.

Additional audio passthrough formats

Support for audio formats such as DTS, DTS HD and Dolby TrueHD (with Atmos) through compatible surround sound setups has been added.

Audio output configuration

TV: Always 2 channel PCM

Optical or HDMI ARC : Dolby Digital 5.1CH

Home Cinema via HDMI : Full passthrough up to 7.1CH

Media player compatibility

Now supports audio passthrough and audio delay in other media players for improved compatibility, such as VLC, Kodi and PLEX.

Video upscaling

Improved video upscaling sharpens edges and reduces blur for a more defined video performance.

Colour settings menu

The settings option now shares a similar look and feel with other menus.

Updated standby LED option

This option allows users to turn off the deep standby LED.

S/AD Dialog UI

Quick access to current audio and video output status, and select optimal settings for content.
