Suttrue®

ROBOTIC

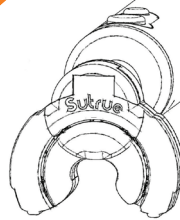

An inspirational Q&A with a panel of thought leaders in medicine, engineering, additive manufacturing and intellectual property, who will discuss the benefits, applications and challenges involved in creating the suturing devices

A ground-breaking interactive suturing session with the robotic version of the device, using the Zeus medical robot

View the handheld version of the device in the museum's 'Designer Maker User' exhibition

A live demonstration of the handheld version and how it compares to conventional stitching

An opportunity to meet the Suttrue® team

HANDHELD
