Neisha's award-winning Parquet design was her first collaboration with Harvey Maria, and is now a favourite with interior designers and architects worldwide. We are excited to welcome you to a brand new series of colourways which celebrate the stylish geometric design, and introduces a contemporary palette with reversed pattern. Parquet 2.0 is the perfect blend of classic design and incredible practicality - these gorgeous tiles create a chic, playful feel in both modern and traditional interiors.

A painted floor in an old house inspired this Celtic Cross design. I think it works as an alternative to a chequerboard pattern. It adds style to this very practical, versatile material, so suitable for kitchens, bathrooms, hallways or indeed any area of the house.
