BRADFORD networks

10 STEPS TO A SECURE BYOD PROCESS

Which mobile devices will you allow onto your network?

Now, which OS versions will be allowed?

Next, what applications are required and not permitted?

Determine which employees will be allowed to use these devices.

Now, who has network access based on who, what, where and when?

Educate employees prior to purchasing a mobile device.

Next, inventory your authorized devices.

Then, inventory your authorized users.

Control access based on the need to know.

Finally, be sure to conduct continous vulnerability assessments.
