

Driving After Dark - Regional Statistics

A new survey¹ commissioned by the Eyecare Trust and not-for-profit insurance provider, Westfield Health reveals more than half of Britain's 34 million motorists struggle to see when driving after dark, whilst many more avoid driving at night altogether.

Here's a regional breakdown of some of the key survey responses...

	London	Midlands	Yorkshire & Humber	North East	North West	Scotland	South East	South West	Wales	Northern Ireland
No of motorists who don't drive at night	31%	42%	38%	16%	30%	27%	26%	29%	33%	29%
No of motorists who admit things look blurred when driving at night	47%	47%	59%	26%	47%	47%	39%	30%	44%	54%
No Motorists who admit they have trouble focusing when driving at night	25%	31%	27%	19%	29%	23%	21%	21%	29%	33%
No of Motorists who suffer some visual discomfort from oncoming headlights	66%	88%	77%	61%	73%	67%	77%	64%	69%	71%
No. of motorists who suffer MAJOR discomfort from oncoming headlights	28%	43%	30%	19%	34%	35%	28%	23%	36%	38%
